PROFESSIONAL SUMMARY

Python Backend Developer with 3 years and 7 months of experience designing and developing scalable enterprise applications, RESTful APIs, and microservices using Python, Django, Django REST Framework (DRF), and FastAPI. Experienced in building high-performance backend systems for FMCG and Utility sector clients, focusing on scalability, security, and business workflow automation.

Proficient in PostgreSQL, MySQL, Redis, Celery, RabbitMQ, JWT, OAuth2, RBAC, and SAML2 SSO with hands-on experience in database optimization, asynchronous processing, API integrations, and distributed systems. Skilled in deploying and supporting production applications on AWS using Docker, Nginx, and CI/CD pipelines.

Strong experience in client communication, requirement gathering, architecture discussions, production support, and delivering reliable solutions that improve operational efficiency and business outcomes.

KEY SKILLS

Python | Django | Django REST Framework (DRF) | FastAPI | PostgreSQL | MySQL | Redis | Celery | RabbitMQ | AWS | Docker | RESTful APIs | Microservices | JWT | OAuth2 | RBAC | CI/CD | System Design | Performance Optimization

EXPERIENCE

Triazine Software Pvt. Ltd.

Nov 2024 – Present

Software Engineer | Python Backend Developer

Noida, Uttar Pradesh, India

- Designed and developed enterprise-grade backend applications using Python, Django, Django REST Framework (DRF), and FastAPI for FMCG and Utility sector clients.
- Architected and maintained 100+ RESTful APIs supporting distributor management, sales automation, billing, inventory tracking, workflow automation, and customer lifecycle management systems.
- Collaborated with clients and business stakeholders to gather requirements, translate business needs into scalable solutions, and participate in architecture discussions and technical planning.
- Built asynchronous processing pipelines using Celery and Redis for bulk data imports, scheduled jobs, notifications, and large-scale reporting, improving operational efficiency by over 50%.
- Optimized MySQL databases through indexing, query tuning, schema design, and caching strategies, reducing API response times by up to 40% and improving application performance.
- Integrated SAP, AWS S3, Firebase, FTP servers, SMS gateways, and payment gateway solutions while supporting production deployments, release management, and L2/L3 production support.

Hajela IAS Academy

Jan 2023 – Oct 2024

Full Stack Python Developer

Bhopal, Madhya Pradesh, India

- Developed and maintained web applications using Django, Django REST Framework (DRF), JavaScript, and MySQL for educational technology and content management platforms.
- Designed and integrated 30+ RESTful APIs, enabling seamless frontend-backend communication and improving application scalability and maintainability.
- Automated PDF content extraction, question bank generation, and reporting workflows, reducing manual effort by over 70% and significantly improving operational efficiency.
- Developed role-based dashboards, user management modules, and workflow automation features supporting administrators, faculty, and students across the platform.
- Optimized database queries and application workflows, improving overall system performance by 25% and enhancing user experience.
- Managed application deployments using Docker, Nginx, Unicorn, and Linux environments while collaborating with stakeholders to deliver scalable solutions within project timelines.

TECHNICAL SKILLS

- **Languages:** Python, SQL, JavaScript
- **Backend:** Django, Django REST Framework (DRF), FastAPI, RESTful APIs, Microservices, API Integration
- **Databases:** PostgreSQL, MySQL, SQLAlchemy, Database Design, Query Optimization, Indexing
- **Caching & Messaging:** Redis, Celery, RabbitMQ, Asynchronous Processing
- **Security:** JWT, OAuth2, RBAC, SAML2 SSO, API Security
- **Cloud & DevOps:** AWS (EC2, S3, RDS), Docker, Nginx, Gunicorn, CI/CD, Jenkins, GitHub Actions
- **Data Processing:** Pandas, Openpyxl, Excel Automation, CSV Processing
- **Architecture:** System Design, Scalability, Distributed Systems, Performance Optimization
- **Tools:** Git, GitHub, Linux, Postman, Swagger/OpenAPI, Agile Methodology

PROJECTS

FMCG Secondary Sales & Distributor Management System – Godfrey Phillips India

- Developed enterprise-scale Sales Force Automation (SFA) and Secondary Sales Tracking platform supporting distributor operations across multiple regions and trade channels.
- Processed high-volume primary and secondary sales data from distributor ERP systems, enabling real-time sales visibility, analytics, and business reporting.
- Built distributor performance scorecards, target tracking modules, and incentive calculation engines to support sales planning and decision-making.
- Automated large-scale reporting and data aggregation workflows, reducing report generation time by over 50% and improving operational efficiency.

Modern Trade Management System – Godfrey Phillips India

- Developed enterprise-scale backend platform supporting Modern Trade operations, secondary sales management, and field-force automation across multiple business regions.
- Built outlet mapping, attendance tracking, route planning, inventory management, and order processing workflows to streamline field sales operations.
- Generated sales analytics, inventory insights, and bill ageing reports, enabling data-driven business decisions and operational visibility.
- Supported thousands of field executives, managers, and distributors through scalable and highly available backend services.

CUGL Domestic PNG Lifecycle Management Platform

- Developed end-to-end consumer lifecycle management platform supporting PNG registration, billing, field operations, and customer service workflows.
- Integrated SAP and CGD systems to enable real-time synchronization of customer, billing, and operational data across business units.
- Built bill ageing and recovery management solutions that improved financial tracking and streamlined collection processes.
- Implemented payment processing, transaction reconciliation, and workflow automation modules to enhance operational efficiency and customer experience.

AGL File & Bill Tracking System (FTS/BTS)

- Developed workflow automation platform for vendor billing and document tracking operations.
- Implemented multi-level approval workflows across Finance, HR, HSEQ, Operations, and Management departments.
- Built vendor portals, contract mapping systems, and approval dashboards.

- Integrated Firebase notifications and automated email alerts improving workflow visibility.
- Developed financial reports, ageing reports, and operational dashboards using Pandas.
- Implemented RBAC, workflow automation, audit trails, and approval tracking mechanisms.

LMS and Test Series Generator , Hajela IAS Academy

- Developed Django-based automation system to extract and structure content from PDF documents
- Implemented data preprocessing pipelines generating structured Excel reports
- Reduced manual content preparation time by 70% through workflow automation
- Containerized deployment using Docker, NGINX, and Gunicorn

ACHIEVEMENTS

- Delivered and supported 5+ enterprise-scale backend applications for FMCG and Utility sector clients.
- Designed and maintained 100+ REST APIs supporting mission-critical business operations.
- Improved application performance by up to 40% through query optimization, indexing, and caching strategies.
- Implemented Celery and Redis-based asynchronous architectures reducing report generation time by over 50%.
- Successfully integrated SAP, AWS S3, Firebase, Payment Gateways, FTP Servers, SMS Providers, and SAML2 SSO solutions.
- Actively participated in client discussions, requirement gathering sessions, architecture reviews, deployment planning, and production support activities.

EDUCATION

Rajiv Gandhi Proudlyogiki Vishwavidyalaya (RGPV) <i>Bachelor of Technology (Computer Science & Engineering)</i> • CGPA: 7.83 / 10	Aug 2018 – Jul 2022 Bhopal, India
---	--------------------------------------

Madhya Pradesh State Board <i>Higher Secondary Education (Class XII - PCM)</i> • Percentage: 73.66%	Jun 2017 – May 2018 Biaora, India
---	--------------------------------------

Madhya Pradesh State Board <i>High School Education (Class X)</i> • Percentage: 84.66%	Jun 2015 – May 2016 Biaora, India
--	--------------------------------------

LEADERSHIP & ACTIVITIES

- Mentored junior developers on Python, Django, Django REST Framework (DRF), FastAPI, API development, and backend engineering best practices.
- Contributed to backend architecture discussions, code reviews, and technical decision-making for enterprise-scale applications.
- Led automation initiatives for reporting and business workflows, improving operational efficiency and reducing manual effort across projects.
- Actively upskilling in scalable system design, distributed systems, cloud-native architectures, and modern backend engineering practices.
- Actively exploring AI/ML, Computer Vision, Generative AI (GenAI), Large Language Models (LLMs), and their integration into scalable backend applications.
